

Bait Station

Anticoagulant Rodenticides

Predators feed on rodents - controlling their populations
When we use poisons we kill natural predators as well.

! PET SAFETY ALERT !

Rodent Bait Stations can harm neighborhood cats and dogs.

Aptive Environmental is going door to door in this Seattle neighborhood promising “pet-safe” rodenticides and pesticides.

www.goaptive.com/our-products tells a

different story: Bromadiolone, difethialone, and diphacinone. Lethal in dogs & cats with LD50 at 5-15 mg/kg. Harmful to children, pets, and adults.

If you find dead rats in your yard or were misled by a pesticide company please contact safety@safeseattlepets.com
